

Caerus Trading looking for (Junior) Derivatives Traders

Caerus Trading is a dynamic and innovative company active as a market maker on different equity and index derivative markets and is located at the exchange building in the heart of Amsterdam. Currently our team consists of ten people; seven traders and three researchers. Caerus uses state-of-the-art software for implementing its trading ideas and is looking for (junior) derivatives trader to strengthen our trading team.

Job description

As part of the trading team you are responsible for trading and pricing derivatives products using a wide range of cutting-edge trading tools and strategies to tackle the opportunities in the market. Specific other activities include:

- Strong interaction with our Research and Development desk to enhance existing trading strategies & derivatives models and to assist in the development of new strategies and trading tools
- Risk management of trading portfolios

In this technology driven environment your trading and analytical skills are used to its fullest extent to achieve the set goals. Your job begins with a training program in derivatives trading and to learn using our trading systems as well as our in-house developed trading strategies.

Demanded

- Masters degree ideally in Economics, Econometrics, Mathematics or Finance
- Strong quantitative and analytical qualities
- Drive, discipline and motivation to work in a dynamic trading environment
- A keen interest in the financial markets is a must, but no prior in-depth knowledge required

Please send your application letter and resume to info@caerus.nl
